

Flash Alert Pedestrian Crossing Sign Spec Sheet

Our Flash Alert Pedestrian Crossing Signs are designed to warn drivers of pedestrian crossings and to use caution when approaching the areas where pedestrians are present. Ultra-bright LEDs are visible in all weather conditions, and whether in congested cities, or on rural and remote roadways, they bring the signs to life at night when drivers might not otherwise know they are approaching crosswalks.

Flash Alert Systems operate 24 hours /7 days a week at top performance with our auto dimming and multi-stage battery charger features built into our smart controller.

FEATURES

- Simple installation
- Solar powered
- Visible day and night
- Automatic light output for maximum efficiency
- Super bright LEDs
- Compact battery box
- Ultra slim design

Solar Powered

With solar technology, this system can virtually be placed anywhere off the grid. With the “off the shelf” battery and smart controller housed behind the solar panel, installation is a snap.

Reflective Sign

High intensity signage and MUTCD compliant.

Ultra-Bright LEDs

Our ultra-bright LEDs are one of the brightest in the industry and are completely weather proof. The LEDs will adjust brightness according to available light in order to conserve energy and battery life and maximize brightness.

Compact Battery Cabinet

- All controls hidden behind solar panel
- Off the shelf battery
- Smart controller
- Lightweight design
- Multi-stage battery charger
- Maximum power point tracking

Sign Design	Pedestrian Crossing
Sign Size	30" and 36"
Sign Material	High Intensity Prismatic Reflective
Solar Panel Wattage	30W
LED Color	Amber
Number of LEDs	4
